

CITY OF GLEN DALE - WATER SYSTEM IMPROVEMENTS

Marshall County, WV

Contract No. 1 - WATER LINES & BOOSTER STATION: Unit price contract to construct approximately 4,900 feet of 8", 6", 4" and 2" waterline, 30 feet of highway borings, 46 valves, 2 fire hydrant relocations, 5 flushout assemblies, reconnecting 41 customers, making 24 tie-ins to existing mains, 1 pre-engineered water booster station, decommissioning of the existing booster station and other work required to provide a complete operating water system.

Contract No. 2 - WATER STORAGE TANK: Lump sum contract to construct one (1) water storage tank measuring 25 feet in diameter by 28 feet in height to the overflow with a nominal volume of 105,000 gallons. Contract also includes demolishing and removing from site, the existing Skyline Water Tank. This can only take place after the new tank is built and in service.

Contract No. 3 - WATER STORAGE TANK REPAINT: Lump sum contract to do general repairs and repaint the existing Main Tank interior and exterior which measures 46.5 feet in diameter by 40 feet in height to the overflow with a nominal volume of 500,000 gallons. This contract also requires the installation of a temporary tank(s) with at least 25,000 gallon capacity to keep the City of Glen Dale in service while painting, fencing around the Main Tank and Booster Station along with installing Gabion Baskets.
